ensures you have premium streaming links. What is the best Live TV App for FireStick? On the Live TV front, Live Net TV, Ola TV, and HD Streamz are doing a fine job. These best FireStick apps feature tons of live TV channels for movies, shows, sports, kids, and more. These are free FireStick apps. What is the best app for a jailbroken FireStick? It depends upon the type of content you want to watch. If you like to stream movies and shows, you would like Cinema HD and Nova TV. On the other hand, if it is the live TV you want, we recommend Live Net TV, Ola TV, and HD Streamz. However, the one app that should be part of your jailbroken FireStick is ExpressVPN. This app will secure your online streaming by hiding your online identity and ensuring your activities cannot be traced back to you. How do I download movies on FireStick? FireStick Apps like Cinema HD let you download movies and shows onto your device. However, I do not recommend it because FireStick has a low storage capacity. Movies will occupy a lot of space in your storage and cause many problems, including buffering, overheating, and more. Discontinued FireStick Apps Here is the list of the apps that do not work anymore. I am still keeping them here so that you know which ones don't work, and if you run into any of them anywhere else, you do not end up wasting time trying to install them. CineHub (Free) CineHub is an excellent app for streaming movies and TV shows. This app is suitable for lovers of classics, popular titles, and the latest releases alike. This streaming app's immense database of movies and series is regularly updated with the newest titles. New content is uploaded virtually every day on this app. At the same time, it has an impressive collection of Westerns, cult classics, and other obscure titles. On CineHub, you can stream movies and TV shows in high quality. Even though the videos are in HD or higher, there is very little buffering, thanks to CineHub's quality servers. There are multiple links for any content that you are interested in watching. That way, if a streaming link is broken, you can switch to another without having to give up streaming your movie or show. It also comes with the option to watch videos offline. While it comes with a built-in media player that offers support for several file formats, users can still use external players. CineHub is not a paid app. FireStick users can stream on this app without having to sign up or pay a subscription. How to Install CineHub on FireStick FileLinked (Free) The popular file-sharing app DroidAdmin has been rebranded, repackaged, and is now available as FileLinked. Whether you want to share photos, videos, music, or APKs, FileLinked will do it all for you. This also makes FileLinked an incredibly useful side-loading tool. While Downloader and ES File Explorer continue to be the most popular side-loading apps on FireStick, FileLinked is making quick progress too. The app makes sideloading a hassle-free process. All you need to do is obtain the file code from the uploader and enter it in FileLinked. The app will do the rest. There is absolutely no need to enter the long URLs anymore. FileLinked is all the handier for FireStick users since this device doesn't allow you to download the APK files directly from the browsers. I have noticed that more and more developers these days are offering FileLinked codes for mobile and FireStick apps. Therefore, it only makes sense to have this app on FireStick. How to Install FileLinked on FireStick Typhoon TV (No longer available) Typhoon TV is a streaming application for free movies and TV shows. It is the clone of the once very popular Terrarium TV. You can browse Typhoon TV for hundreds of movies and shows, including the latest ones. The app is fetching lots of high-quality streams from various reliable sources. It also works great with the premium link generator Real Debrid. Typhoon TV has a remote-friendly interface and offers smooth navigation on FireStick. It lets you quickly find the content you want to watch by several categories and filters. If you are looking for quality on-demand streaming, give Typhoon TV a try. How to Install Typhoon TV Morphix TV Morphix TV is a clone of the popular app Morph TV. Even though the app is still in the development phase, I decided to include it on this list of best apps for FireStick. That's because it offers a wide range of movie titles and allows one-click playback. It has a section for TV-Shows. However, it is still offline as I write this. Morphix TV is a small-sized app that works smoothly on FireStick as well as Android TV devices. It has a remote-friendly app allowing easy navigation on the big screen. Give it a try. How to Install Morphix TV Morph TV (Free) Even though the very popular Morpheus TV is all but defunct, its clone Morph TV is rapidly gaining a good reputation among the streamers. You may still install Morpheus TV and use the existing content library, it no longer gets any new updates. On the other hand, Morph TV has the support of an active team of developers. The software upgrades are regular and the media collection is constantly refurbished with new movies and TV shows. Morph TV has an unsophisticated interface allowing you to get started without having to go through any learning curve. The app scrapes quality streams. However, I miss Real-Debrid support. I hope it is added soon in one of the future software updates. How to Install Morph TV UnlockMyTV (Free) UnlockMyTV is a great option to watch your favorite movies and shows currently. The media library is strong and regularly updated with new content. You will find almost all the new movies and shows. What I really like about this app is its ability to scrape superior-quality streaming links from a variety of sources. I was impressed to see several 1080p streams. And, there are barely any dead links. Almost everything works here. UnlockMyTV is gaining popularity as a Cinema HD clone. Both are strikingly similar in form and function. Both are performing superbly too. How to Install UnlockMyTV on FireStick Players Klub IPTV (Paid) The Players Klub IPTV is another quality IPTV service. It gives you access to more than 2000 TV channels. While most channels are from the USA, you can also watch plenty of TV channels from countries like Australia, the UK, Canada, and more. This IPTV service comes at an affordable price of \$8 per month. Given the fact that it has a huge collection of channels and all streams at high-quality, I would say it is a pretty amazing deal. While Players Klub IPTV is primarily a live TV app, it also has a decent on-demand section with dozens of movies and TV shows for your streaming delight. Unlike a lot of free FireStick apps, Players Klub IPTV offers a more reliable and higher quality video playback. The Players Klub IPTV has an Android app you can install on FireStick. The app is completely remote-compatibility, allowing easy handling and navigation. The service also offers a Kodi addon, which you can again use on FireStick through Kodi. However, the Android app seemingly works better on FireStick than the addon. Of course, the addon makes Players Klub IPTV a multiplatform service. How to Install The Players Klub IPTV Locast (Free) Locast is a non-profit service that streams television over the internet for free. If you live in or around the 31 cities where Locast operates, you can gain access to a variety of local TV channels for free without needing an antenna or cable. You could also use a VPN to set your location to a nearby metropolis. This streaming app requires that you create a free account on its website before you can use it. On the site, you are given an activation code. You can watch directly on the website or you can download the FireStick app. Either way, you get online access to local broadcasts. As you can imagine, Locast is not the ideal option if you want an IPTV app that lets you watch channels from anywhere. It doesn't have on-demand content either, instead of focusing entirely on live TV. The Locast app for FireStick has a simple and efficient user interface. There is a TV Guide that lists all the local channels in your area, as well as program names and details for each channel. You can stream in high quality, and you will find the streams reliable. Locast depends on donations to operate, so expect a short ad about making a donation before you can watch a channel. Locast is a legal app that can be downloaded on the Amazon Appstore. AOS TV (Free) Want access to an immeasurable library of your favorite movies, TV channels, and news? Then, the AOS TV app will win you over. Cartoons, IPTV, movies, music, and more: AOS TV covers a wide range of entertainment sources. The AOS TV app is packed with great features. With the filter option, AOS TV lets you find content by country, and the search option enables you to find anything in a snap. All in all, AOS TV is one of the best free live TV and media streaming applications available right now. How to Install AOS TV on FireStick Mobdro (Free) If you like watching sports and at the same time don't want to spend a penny for that then Mobdro is the right Fire Stick app for you. Don't look for this app on the Amazon App Store because it can only be downloaded from Mobdro's official website. If you are a Kodi user, you can install it on Kodi itself. Once you download this application and run it on your Fire TV, you'll notice that Mobdro keeps on searching free video streaming around the globe and sends it directly to your device, making it a very useful tool in the said regard. You can enjoy the free streaming service for as long as you want, but if you wish to remove unnecessary bulky ads then you have to purchase a premium account. With a premium subscription, you can not only enjoy ad-free entertainment but also capture and download the live streaming videos and store them for later viewing. How to Install Mobdro on FireStick To Conclude The Amazon FireStick has enormous potential. It won't be long before we see people abandoning cable and dish and opting for internet streaming. When it comes to enjoying flexibility in what you want to watch, it makes perfect sense. If you are planning to buy an Amazon FireStick or already have one, the above applications can be helpful. Eventually, you will get a taste of different entertainment and figure out which apps are your favorite. While some applications are free of cost, others will set you back by a few dollars if you'd like to enjoy premium features. The list above is a mix of both and will make your device a complete entertainment source.
